About Company:-

The demand of various engineering industries has been rapidly increasing world- wide, during recent years due to the large quantities and wide varieties of alternatives available around the globe.

The concept for foundation of TAP's commitment is simple. The company helps its customers by meeting their goals and targets for profitability by providing three fields of excellence i.e.

- Technological Innovation
- Administrative Support
- Professional Guidance

TAP Entered in project engineering field in 2013 by executing large projects for oil, solvent extraction and bio-diesel plant. The Company is managed by Mr. Pavan Misra Mechanical Engineer with over 5 years of extensive experience in project industry. With a team of known professionals from the industry the company has handled many prestigious projects for oil, Physical Refinery, Process instrumentation, Refrigeration, Bio-diesel etc.

TAP also provides services within India and abroad for

- Designing of Custom built plant and support systems
- Improvement and up gradation of existing plants
- Consultancy
- Feasibility Reports
- Project Planning – Scheduling, Monitoring & execution
- General Factory & Non Factory layouts
- Designing of civil engineering works
- Designing of utilities and Service Systems
- Piping and Electrical design
- Supervision & Erection
- Plant Start up
- Staff Training
- After sales Services.

Our Vision

Meet the world engineering challenge through our projects. TAP Engineers looks forward to be amongst the most respected and complete solution providing company in the field of Edible oils, Speciality Fats and bio fuel industry.

Our Mission

TAP Engineers provides world class services and innovative solutions for all our customers in the most economical way. We are always approachable to our customers and their satisfaction is our utmost Moto.

Taking it Next Level is Our Attitude

It is our approach to business, Partnerships and Aspirations, it embodies our sprit and our outlook, It is the message we want to convey through our words and above all our actions. It is the essence of TAP Engineers making us unique. It means excelling In what we do and succeeding together, Exceeding Expectation and innovating continuously.

Sectors we are serving: -

The major sectors we are serving includes:-

- **Vegetable oil Industries**
- **Biodiesel Plants**
- **Dairy Plants**
- **Soap Industries**
- **Cotton Ginning Industries**

&

Some more.

Unique Range of Activities

A Company involved in Project Management, Engineering and Construction for Process Industry.

Project Management Consultancy

TAP Engineers Project Management Consultancy provides services to a wide variety of industrial projects ranging in size and complexity, both internally to TAP and across the enterprise.

Tap Engineers Project management methodology is a hybrid combination of industry standard framework and tools utilize together with practical experience to manage project requirement form concept to completion. We also work directly with other agencies in review, approval, procurement and management of various projects, Services to enterprise projects may include

- **Pre Project Studies**
- **Project Start**
- **Designing**
- **Procurement**
- **Installation**
- **Commissioning**
- **Project Completion**

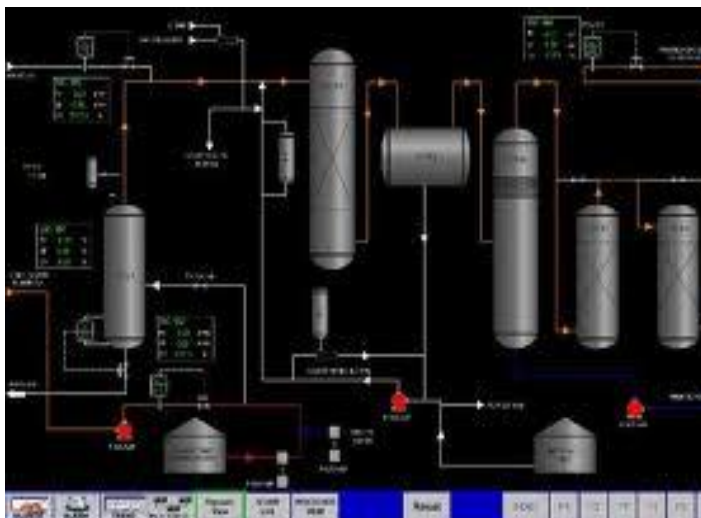

New Project Deliverables

TAP Performs engineering, Procurement, Construction and commissioning of fixed and floating platforms.

Supply of Industrial Equipment and Spare Parts

TAP also supply industrial equipments and spare parts. We ensure quality by taking utmost care in selecting products and suppliers. We perform inspections as and when required to ensure timely delivery and quality products are delivered to end user.

Our Strategic Framework

- Technology
- Key Differentiating Assets
- Execution Capability
- Vertical Integration
- National Content
- Well Diversified, Profitable
- Backlog

Strong Principles of Action

Our Values to Take TAP Further

- Doing the right thin
- Trusting the team
- Encouraging a fair return for all
- Building the Future
- Passion & Dedication
- Team Work, Learning and Sharing

Six Characters to Support these values

- Environment
- Ethics
- Health and Safety
- Quality
- Security
- Social

Benefits of Choosing TAP Engineers and consultant:-

Features and benefits of the services will help to Ensure adaptation of project management and organizational change management best practices and improve the probability of project / programme Success.

Other Benefits of TAP Engineers

Its primary mission to develop, implement, and recommend standardized project frameworks, including traditional and non traditional approaches, It includes developing new project policies, standards , guidelines and procedures that are scalable for varying project sizes and complexity. TAP develops and implement project management tools and templates which support the standardized framework adopted by them.

TAP Develops criterion for the project requested- Process, Project evaluation and project designing to ensure that approved projects are aligned with business goals and objectives based on continuous process improvement from the past experience,

Total Solution Provider

We always believe in providing complete solution to all industrial requirements.

- Feasibility Studies
- Budgetary Project Estimation
- Best technology selection
- Basic Engineering
- Detailed Engineering
- Plant Layout Design
- Procurement
- Plant construction Management
- Plant Commissioning Services
- Upgrading and modification of existing plants
- Plant modernization and retro fitting
